

The image shows a white smartphone lying diagonally against a bright yellow background. The screen displays a manga book summary for "Deadman Wonderland".

Deadman Wonderland

Average rating:

Description:

A massive anomaly caused a great earthquake that ravaged Japan's mainland and destroyed most of Tokyo, sinking three-quarters of the city into the Pacific Ocean.

Ten years later, the story shifts to Ganta Igarashi, a seemingly ordinary student attending Nagano Prefecture's middle school. As an escapee, a survivor of the great earthquake, Ganta has no memories of the tragedy and has lived a normal life. This all changes when a strange person covered in blood and crimson armor floats through his classroom windows. Grinning madly, the "Red Man" massacres Ganta's entire class. Instead of killing him, the "Red Man" embeds a red crystal shard in Ganta's chest. Within days of the massacre, Ganta is subjected to a kangaroo court as a suspect and is sentenced to death at Deadman Wonderland, a prison that doubles as a theme park.

Navigation icons at the bottom of the screen include a house, a magnifying glass, a user profile, and a search icon.

Context

Analist is a social platform that will assist anime lovers track of what shows and movies they already have seen, see reviews from other users, and help keep track of the user had watched before. Even though there are a couple of apps and website that have methods to list the current animes as well the ability to see what you have seen. I want to make this to have interfaces was easy to use, the user experience will be thoughtless, and have the ability to use it on any device with no worries.

1

User Experience

There is about 30 screens to orgainze the users needs and accesible for information

See other friends status

The user can check their status on how many animes they've watched, their watchlist, and see their friends

2

User Interface

Making the UI easy to do and miminial as possilbe

Login with other soical
media account

This image shows a mobile application's account creation screen. The title "Create a Account" is at the top. Below it are six input fields with labels: "Name", "User", "Email Address", "Re Type Email Address", "Password", and "Re Type Password". At the bottom left is a checkbox with the text "I agree with the terms & conditions and policy". At the bottom right is a blue button labeled "Create Account".

Registration

If a user does not see a anime they can add the information and we will do the rest.
